## The Artists

**Margit Björklund** has found her medium in oil paint as she says it suits her temperament. In her paintings she tries to translate feelings into colour and form with a twist of humour.

**Elaine Carlton** is a textile artist whose pictures are composed of a combination of mediums resulting in interesting textures.

**Lavinia Croft** bases her works on images that capture the essence and feeling of her subjects and the intense emotions of people, objects and places, in a very individual style.

**Sally Huntington** takes inspiration from the passion and colour of traditional Andalusian culture. She works in acrylic paint she achieves bold emotional expression resulting again in very original paintings.

**Gunn Jonsson Shabetai** is a fashion- and textile print designer who 10 years ago decided to devote full time to painting. She has since shown her artwork in six separate exhibitions and in twenty group expositions in Belgium, England, France, Spain and Sweden. She works mostly in mixed media and acrylic. Inspiration comes from nature, music, current events, travels, etc.

In this exhibition she is showing her love for tropical flowers and her joy for the Toro's new life without fights.
